

Community Impact Board

Program Description

CIB is a federal program that provides low interest loan and/or grant opportunities to communities that have federally leased land used for mineral extraction. The funding opportunities are to mitigate impacts due to the loss of tax revenue on these federally leased lands.

Eligibility

Communities with federally leased land used for mineral extraction. These communities are required to upload projects they intend to apply for on the Utah Project Portal each spring. Applicants are also required to submit a Capital Asset Inventory every two years.

Eligible Activities

The following activities are eligible for funding: planning; construction or reconstruction of streets, water and sewer facilities, construction or reconstruction of parks and other public works; demolition of buildings and improvements; and rehabilitation of public buildings.

Funding

The Wasatch Front region is not very competitive for grants due to the small amount of federally leased land used for mineral extraction, but can be more competitive for low interest loans. If a community (within Tooele County or Morgan County) submits an application for a project listed on the Utah Project Portal, the Board meets every February, June, and October to review applications.
